Under

ICMR- HOTSTAR-CLIC Project

ICAR Network Programme on AMR (INFAAR)

ICAR-All India Network Project on Fish health

In 2015, countries adopted a Global Action Plan on AMR. Its first objective is improving awareness and understanding of AMR through effective communication, education, and training. Organizing a global annual awareness campaign was identified as an activity to contribute to this objective. Thus, an annual campaign was established to raise global awareness and understanding on AMR, while serving as an important example of One Health collaboration. This campaign was known as World Antimicrobial Awareness Week (WAAW). WAAW is celebrated from 18 to 24 November every year.

The theme for WAAW 2023 will remain “Preventing Antimicrobial Resistance Together”. This is why this year’s theme calls for collaboration across sectors to preserve the efficacy of these critical medicines. Fighting AMR is a truly global endeavour and must be addressed through a One Health approach.
